DETAILED ACTION

Allowable Subject Matter

Claims 22-32 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As for claims 22 and 30-32, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a position detecting system, an exposure apparatus, and a device manufacturing method, in combination with the rest of the limitations of the above claims.

With further regard to the above claims, the applicants' arguments lay out detailed reasons for the allowability of the claims over the prior art. In particular, the prior art fails to disclose an apparatus that actually *images* the light source via an image generated at an image position within the apparatus onto the test object so that an image of the light source, and not light directly from the source itself, impinges on the test object to generate the measurement signal. This, in turn, is interfered with a reference signal that is also generated by the same imaging to generate the desired profile, in combination with the rest of the elements, limitations, and method steps of the corresponding claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
